

CHRYSO®Premia 125S R1

High range water reducing Super plasticizing admixture

DESCRIPTION

CHRYSO®Premia 125S R1 is a new generation superplasticizer – high range water reducer, based on patented CHRYSO® polycarboxylate technology.

CHRYSO®Premia 125S R1 is especially recommended for concrete requiring high early age and long term strengths, whilst maintaining the workability retention depending on cement chemistry.

BENEFITS

- Dramatically increases early compressive and flexural strengths without detriment to ultimate strengths
- Enhances the workability retention of concrete particularly in hot climates.
- The dispersion properties of **CHRYSO®Premia 125S R1** allow the user to optimise the cement content when a specified mechanical strength is required.
- As the particles are highly dispersed, the hydration of the binder is enhanced, resulting in a substantial water reduction and an increase in both early age and ultimate compressive strength of over 30%.

FIELDS OF APPLICATION

- All cement types
- Prestressed concrete
- Steam-cured or non steam-cured concrete
- Precast
- High early age strength
- Plastic or fluid concretes
- Compatible with Micro silica, GGBS and Fly Ash.

CHARACTERISTICS

| | |
|-------------------------|---------------|
| Product Nature | liquid |
| Color | Light brown |
| Lifetime | 12 months |
| Specific gravity | 1,070 ± 0,020 |
| pH | 6,00 ± 2,00 |

METHOD OF USE

- This product must be added to the mixing water or later on, on concrete.
- Between 0.5 and 2.5 liters per 100 kg of cement. A 1.0 % dosage of the product to the weight of cement is commonly used.
- **CHRYSO®Premia 125S R1** is completely miscible in water. It can be added to part or all of the mixing water depending on the required plasticity. The correct quantity of **CHRYSO®Premia 125S R1** should be measured using a recommended dispenser.
- To make high workability concrete, best results are obtained when **CHRYSO®Premia 125S R1** is added directly into the mixer.
- Because local job conditions vary, please contact your local CHRYSO sales representative for further assistance if using outside recommended dosage ranges.

Dosage :

0.5 to 3.0 kg for 100 kg of cement.

PRECAUTIONS

- Protect from frost.
- Should the product freeze, it will recover its properties. After thawing, an efficient agitation is necessary until the product is entirely homogeneous again.
- Use at a temperature above 0° C.
- Store in plastic containers, PVC excluded.

CHRYSO®Premia 125S R1

High range water reducing Super plasticizing admixture

PACKAGING

- 1000 L IBC
- 200 L drum
- 20 L bucket

NORMATIVE AND REGULATORY INFORMATION

- This product conforms to CE marking. The appropriate declaration can be found on our internet site.
- This product conforms to NF 085 certification, which technical specifications are those applied in the non harmonised part of NF EN 934-2.

SAFETY

CHRYSO®Premia 125S R1 is not considered dangerous to handle. Please refer to the material safety data sheet for additional information.
